referenced here, this says half of it, RISE has access to. They get the first pass. What did that mean?

MR. SCHEFF: Object to the form.

A. You know, from what I recall, it's -- you know RISE, as I said before, the -- we identify the universe of consumers that are responsive and would have a decent default, and then we would overlap them with the RISE states, and then anything -remainder, we would -- as this says, we would split amongst the tribes.

- Q. Who's "we"?
 - A. The -- as a marketing agency --
- Q. That's what you'd do? You'd allocate them first to RISE, and then if there were a remainder, to tribal products; is that right?

MR. GATEWOOD: Objection; form.

19 A. We -- as -- you know, as I stated, we would 20 identify those for RISE, and then any of the 21 remainders, we would recommend splitting them up

their budget. Or, actually, I would say the end of the prior year for budget planning purposes. And we would talk to them about their revenue goals, and we would back into: Well, if you want X, then you need Y type of customers at XZ assumption in terms of revenue.

And so we would create a budget like any organization. We would work with them as a marketing organization, and we'd say: Okay, this is your budget for X amount of customers. We would try to meet that with these different channels, whether it be direct mail, or -- you know, for Great Plains, it also included lead generation, paid search, affiliate traffic.

1.5 BY MR. GROGAN:

- Q. Now, direct mail, by its nature, is an invitation to a customer to respond to a particular product offering; is that right?
- 19 A. In general.
- 20 Q. So there would be direct mail that would 21 say, "Please call RISE if you want a loan," right? 22 And there would be some direct mail that said,

"Please call Plain Green if you want a loan," right? 23

MR. GATEWOOD: Objection; form.

A. There's different versions of direct mail.

Page 146

- Q. -- split them up -- how would you split them up between the tribes?
- A. You know, it really depended on different factors.
 - Q. Like what factors?
 - A. What the goals were for each of the tribes in terms of the revenue growth, what each tribe looked like in terms of their offering. You know, Great Plains had a higher APR, and so they were -that product was inclined to take a riskier customer base, as well as the other channels that the tribes were interested in. And so all of those came into play when we talked about the direct mail pieces and where they went.
 - Q. Okay. And who would get direct mail and who wouldn't?
 - A. Again, like, it's all of those factors that I indicated.
 - Q. Okay. And you said one of the factors was what the goals for the revenue growth of the individual tribal products was. Whose goals were

A. So technically, when you're talking about an IT platform, and if it's a legacy and if it's stable, and you know that you want to enhance it, then you would make sure it's stable, and then direct your resources to a new -- a new platform while you build it up.

You don't want to move all of your offerings, regardless of your organization, because that's not -- that's not wise. You want to solely put one offering on it, make sure it's stable, and then move your -- move the other offerings onto that platform, because it's a new platform.

And so the -- this whole area is about a discussion of moving off of the old platform and creating a new platform and what's the best mechanism to do that to make sure that it -- there's no interruptions in service with our current providers -- or current lenders.

- Q. Right. But the only product that would reside on the new platform would be RISE?
 - A. No, that's not what I was stating here.
- Q. Okay.

lenders.

Q. Okay. And why is it that Mobiloans still needs to move? Why did they need to move?A. I think as I indicated before, they were

utilizing CoreCard. CoreCard has some issues. It wasn't built internally, and we were not happy with CoreCard. And the -- that means that we would need

8 to move them off of that platform onto the -- the 9 concept would be Nortridge.

Q. And do you know whether Mobiloans was moved off of CoreCard?

A. I -- I didn't keep up with the technology, so I don't know the ones after I left.

Q. Okay. And do you know whether enhancements were made to the legacy platform?

A. Since I left in 2014?

Q. No. I mean since the date of this

18 document.

A. Yes, I'm sure there were.

Q. Okay. Take a look at 12. We're now talking about customer and product segmentation.

"Do we tailor each product to that need?" And then

it gives examples that, "Great Plains is for thosethat need a second chance. RISE for those that want

25 to make their own comeback." And, "Mobiloans for

A. Mobiloans is a line of credit. And as a line of credit, it's a different -- it looks

different. It's an open loan. It's an open loan credit, just like a -- we call it a card -- a credit

8 card without the card. So you don't -- you always 9 have funds just like your own credit card --

BY MR. GROGAN:

Q. So it gets -A. -- and you can utilize it.

Q. People can get to it faster?

A. It's -- it's not a closed loan --

installment loan. It's different.

Q. And "RISE for those who want to make their own comeback." What -- what were you thinking there?

A. Oh. This is the infancy of RISE. I think it's really just tied to the brand, and concept of rocky and so forth.

Q. But, again, you're seeing -- or at least this example makes -- seems to indicate that you're thinking of these products as serving different segments of the consumer market; is that correct?

But I would assume that the number that's below 100 million consist of direct and bank, and then the other number, the latter number is tribal. Q. Actually back in 2013, there were no bank products at that point; am I right? A. I don't know for sure. Q. But we can agree that of the 800 million in revenue in 2013, according to this table, more than 700 million was from the tribal products? A. That's what this chart says, appears to say. Q. So am I correct that the statement, we are not adhering to our diversification strategy, the meaning of that is that the company has become too dependent on the tribal

There could have been. Do you remember ever seeing a list of states other than the 14 states that are listed here on Exhibit P-254? MR. SHELDON: Ms. Cutrona, I'll just give you an instruction. If your answer is, you don't remember or you don't know, I'm fine with you giving him that answer. If your answer would be affirmative in some sense, and it would require you to reveal legal analysis that was done inside Think or at the request of Think by outside counsel, I'd ask you to acknowledge that and we can step out in the hall and discuss how to handle it. In fact, with regard to I think it may have been in the fall of 20 I am not sure what year it would have been, but prior to the program being for ThinkCash loans being offered in Pennsylvania, a letter went to the Commonwealth and it described the program with the parties that were involved in the program. It described the services that Think would be providing to the bank. And the question was, do we need this I think it's the loan brokers services license? I am not even sure of the exact name. So that went out. I think, I don't know if it was Cater Frantz or Jim Kaiser. Jim Kaiser was usually who I would talk to regarding any question I had in Pennsylvania. And I called in January, after that letter was sent in the

With regard to the early days of Plain Green, the tribe funded the loans in the first instance by money that came from Think Finance, but went through Mr. Haynes first? MR. HERMAN: Object to form. THE WITNESS: So my understanding, and I wasn't involved in these discussions, but my understanding is Steve Haynes represented himself to us. In fact, I do know this, he represented himself to us as a tribal expert. He had worked with specifically the Chippewa Cree Tribe in the past. He had entered into financing agreements within specifically related to their casino operations and with equipment that they use in their casino.

If you turn to page 26, at the bottom the last paragraph: Congress is aware that state laws regulating payday lenders and other non-bank financial institutions may be largely unenforceable against Indian tribes due to their tribal sovereign immunity, and there have been efforts to make state statutes generally applicable through federal legislation. Do you see that? A. Yes, I see that. Q. There never was a statute passed by Congress to give tribal entities any power in the consumer lending area, has there been? MR. SHELDON: Objection to form. BY MR. ACKELSBERG: Q. Are you aware of there being any act of Congress that gives tribes that power?

And then she gets a reply from someone named Paula Lamere, and I guess this is the Paula that previously you weren't sure who that was, right? A. No. I think it was Nicole. Q. Nicole. You're absolutely right. Right. So this was a different person at Plain Green, Paula Lamere, and she writes back, and she's the compliance person she's a compliance person there. And she says: I have the same question as Jim. The SOP states the lender will have five assigned employees review proposed apps on a daily basis for final approval. Plain Green as the lender does not have employees assigned to this process. So if this is an implemented SOP, who is going to be completing the process on a daily basis? So let make sure I'm reading this right. Plain Green has this ability	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	form. BY MR. ACKELSBERG: Q. Agreed? A. Agreed. Q. All right. A. A clarification. In compliance with their own SOP. Q. Yeah, sure. I understand. I understand. And so then Michelle writes back: Well, at some point in time, you had people approving the loan at the reservation. I'm not sure who passed this responsibility on to the next person. Do you know if Joel has been doing this or at least the access to do so? I believe it was done by the back office and by members who are no longer with Plain Green. That's her reply, right? And she sends this to the other people within the tribe that have been on this e-mail, this group discussing this issue and also she includes Blake Richter, right? Now, Blake Richter was who?

Do you remember discussing the idea or discussing the approach that you from the information that you learned by talking to Mr. Anderson and Mr. Eckman, did you communicate that with Mr. Brown? A. Yes. Q. Okay. And what did you discuss? A. We discussed what kind of tribe would fit the parameters needed to be able to own and operate an online lending business. Q. Okay. And so you and Mr. Brown at that point had dealings with a number of tribes	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	casino was helpful because you would need good communication lines, T1, T3, so that you could have data and servers and have access to the outside world using the Internet. You'd probably need you would need some kind of education or classes served to the people of the reservation that would help them in some form, like accounting or customer service. And we'd just usually go through a checklist and see how good the high school was; was there junior college or a community college on campus or nearby; was it a stable government? We always look at that just for in general terms. So we would have checklist we would go through to see if something was, you know, was a good fit.

2 THE VIDEOGRAPHER: This is an

- 6 principal place of business is Jeffries Court
- 7 Reporter Inc., which is located at 1015 Mount
- 8 Avenue, Missoula, Montana. Today is Friday,
- **9** October 5, 2018. The time is 10:37 AM. The
- 10 deposition is being taken at the offices of
- 11 Baldwin Court Reporting 306 3rd Avenue, Havre,

- 18 themselves.
- **19** MR. ELLIS: Yes. Good morning, this is
- 20 Steven Ellis and I represent the Think Finance
- 21 entities.
- MR. GUZZO: Good morning, this is Andrew
- 23 Guzzo, I represent the Virginia claimants in this
- 24 case, and also my colleague Ms. Kelly, Kristi
- 25 Kelly, will be joining us at some point when her

- 1 Q. Thank you. When you were the CEO of
- 2 Plain Green, how many hours per week did you work
- 3 on matters relating to Plain Green?
- **4** A. Say maybe 60, I guess.
- **Q.** And what about the earlier time when you
- $oldsymbol{6}$ were the COO, was it the same, more or less amount
- 7 of work per week?
- **8 A.** It was the same. It was pretty much I
- **9** worked whenever, like, just whenever I needed to
- 10 or all the time.
 - **Q.** Now, in the first session of this
- 12 deposition we talked about a document that had
- 13 been marked as Exhibit 3, which is a transcript of
- 14 another deposition that was taken of you a few
- 15 months ago in Great Falls. Do you remember that
- 16 deposition?
 - A. Yes.
- **18 Q.** Now for that deposition, the one that was
- 19 in Great Falls a few months ago, did you receive a
- 20 subpoena requiring you to testify?
- **21 A.** No.
- **Q.** Do you recall who told you about the
- 23 deposition?
- **24 A.** I think I received a phone call, I can't
- 25 remember. But also Bobbi Favel, who is also -- I

- **4** MR. BYRNE: Hi, this is Matt Byrne, I
- 5 represent Ms. Miller.
- 6 THE VIDEOGRAPHER: The name of the
- 7 witness is Billi Anne Raining Bird and the oath
- 8 will now be administered by the notary.
- 9 BILLI ANNE RAINING BIRD,
- 10 called as a witness here, having been first duly
- sworn, was examined and testified as follows:
 - EXAMINATION
- 13 BY MR. ELLIS:

12

- **Q.** Good morning, Ms. Raining Bird, this is
- **15** Steven Ellis. I was the one who was questioning
- **16** you during the first session of your deposition.
- 17 And I just want to ask first and importantly, can
- 18 you hear me okay?
- **19 A.** Yes, it's fine.
- **Q.** Okay. As we talked about last time, if I
- 21 ask you a question and you don't understand,
- 22 please let me know, and if you need to take a
- 23 break at any time, please let me know that as
- 24 well. Is that okay?

www.baldwinreporting.com

25 A. Yeah. That's fine.

- 1 don't know if she's part of this too, but I guess
- she told me about it as well, but that's kind of
- 3 how I heard about it, but I believe I received a
- 4 phone call at home, so.
 - **Q.** And that is a phone call, did they just
- 6 tell you when and where to show up?
- **7 A.** Yes. I'm pretty sure that's what it was,
- 8 yeah.

5

11

- **9 Q.** Do you recall who you spoke to during
- 10 that phone call?
 - A. No. I don't.
- **Q.** Before you testified in that other
- 13 deposition did you speak to anyone about the
- 14 deposition? You mentioned someone called you on
- 15 the phone, you mentioned Ms. Favel, anyone else?
- **16 A.** No. Well, my federal probation officer
- **17** is all.
- **18 Q.** I'm sorry, could you just repeat that? I
- 19 didn't hear the answer.
- 20 A. I just advised my federal probation21 officer about that I was requested to.
- **22 Q.** Okay.
- 23 A. Yeah.
- **Q.** Did you speak to anyone, anyone who's a
 - member of the tribal council about the deposition?

19

22

- **1 A.** Yes.
- 2 Q. And Plain Green really had no role in
- 3 that process; is that right?
- **4** A. Other than I guess signing the agreement
- 5 to -- with that vendor, no.
- **6** Q. Okay. So, if a vendor made an error in
- 7 collections, that was something that Think Finance
- 8 would deal with, not Plain Green; is that right?
- 9 A. Yes.
- **10** Q. And if vendor had a question about an
- 11 account or a business procedure they would go to
- **12** Think Finance not Plain Green; is that right?
- **13 A.** Yes, it would go through that call center
- 14 that handled that.
- **15 Q.** Okay. And so, Plain Green didn't have
- 16 any employees that handled collections from 2011
- **17** through 2013; is that right?
- **18 A.** That's correct.
- **19 Q.** Okay. What about customer support, and,
- 20 you know, I guess that's pretty broad. So I
- 21 assume what this means is the interaction between
- 22 a consumer and what would probably be represented
- 23 as Plain Green, but can you tell me what you think
- 24 customer support means?
- 25 A. That customer support could be just in

- 1 would be to a call center and I believe the call
- 2 center was at Think Finance for that one.
 - Q. And Think Finance managed the
- 4 relationship with the call center; is that right?
- **5 A.** Yes.
- **6** Q. Okay. Finally, was this agreement in
- 7 effect when you stopped working for Plain Green?
 - A. Yes.
 - Q. Okay. All right. I'm going to switch
- 10 now to the fifth document I sent Stacy. That is
- **11** the marketing agreement.
- **12** (Exhibit 16 marked for identification.)
- **13** BY MR. GUZZO:
- 14 Q. Ms. Raining Bird, do you recognize this
- 15 document?
- **16 A.** Yes.
- 17 Q. Okay. And if you turn to the back of
- 18 this agreement on Page 14, I'm hoping that you
- 19 will see your signature on the document?
 - A. Yes.
- **Q.** Do you see that?
- **22 A.** Yes, I do.
 - Q. This isn't --
- **24 A.** Yes. My signature is on there, yeah.
- 25 Q. All right. And is Jason Harvison's

98

- 1 general questions about their loan or complaints
- 2 about their loan or just any inbound calls
- **3** regarding, I guess, any area of the loan process,
- 4 I guess.
- **5** Q. Okay. And so, from 2011 until you left
- 6 Plain Green, that was not handled on the
- 7 reservation by Plain Green employees; is that
- 8 right?

13

- **9 A.** That's correct. We did not handle that.
- **10** Q. So, if someone emails complaints at
- 11 plaingreen.com that email actually didn't go to an
- 12 employee of Plain Green; is that right?
 - A. I don't think so, no, it did not.
- 14 Q. If a consumer wrote a letter to Plain
- **15** Green complaining about the status of their loan
- 16 or payment, that would not have been dealt with by
- 17 Plain Green either, right?
- **18 A.** Not originally, no.
- **19 Q.** And if a consumer called Plain Green's
- 20 telephone number, who would get that call?
- 21 A. I guess if they called the number that
- 22 was on the website or on the materials that they
- **23** had.
- **24 Q**. Yeah.
- 25 A. We would not get that call. That call

- 1 signature on that?
 - A. Yes.
- 3 Q. All right. Good. And you signed this
- 4 document on behalf of Plain Green in your capacity
- **5** as a chief operations officer; is that right?
 - A. Yes.
- **Q.** What was the purpose of this document?
 - A. Marketing campaigns, which included
- 9 website, maybe mailings, any brochures or emails,
- 10 advertisements basically, yeah, all of it.
- 11 Q. So this is the agreement where, between
- 12 Plain Green and Tailwinds where Tailwinds agreed
- 13 to provide marketing services to Plain Green; is
- 14 that right?
- **15 A.** Yes
 - Q. And Tailwind was paid to perform those
- **17** services under that agreement; is that right?
- **18 A.** Yes
 - Q. And what services were provided by
- 20 Tailwind to Plain Green, to the best you can
- 21 recollect?
 - A. They did bulk mail outs, they developed
- 23 the website, you know, just the -- you know,
- 24 pretty much branding the product and promoting the
 - 5 product, sending out mass emails, buying spots,

- 1 you know, when you enter a -- when you do a search
- 2 where Plain Green would come up at the top or
- 3 closer to the top. Just any promotion of the
- 4 product.
- **Q.** And what role did Plain Green have in the
- 6 marketing of the loans?
- **7** A. None.
- **8** Q. Okay. So you didn't personally
- **9** participate in the development of any marketing
- **10** strategies, did you?
- **11 A.** No.
- 12 Q. Do you understand what the term pro forma
- 13 means?
- **14 A.** Yeah.
- **15 Q.** And what does the word pro forma mean to
- **16** you?
- **17 A.** I don't know. I guess I'm not even sure.
- **18 Q.** All right. I'm going to read the
- 19 definition of this, and I'm going to ask you to
- 20 say whether, what you think about this. So pro
- 21 forma means to be done or produced as a matter of
- **22** form, according to the dictionary.
- So, essentially, it means to be done
- 24 without substance or contribution. And so, would
- 25 you say that Plain Green's review of any marketing

- 1 with any employees of Tailwind?
- 2 A. I meant, I've never seen anybody that
 - introduced themselves as working for Tailwind, no.
- **Q.** So all of your marketing communications
- 5 with Think Finance, were with Think Finance, not
- **6** Tailwind; is that correct?
- **7 A.** Yes.
 - MR. ELLIS: Objection to the form.
- 9 BY MR. GUZZO:
- **10 Q.** So did that ever concern you?
- **11 A.** Yeah.
- **12 Q.** And so, would it be fair to say, that you
- 13 were concerned that you would be paying a company
- 14 that you didn't even interact with?
- **15 A.** No. My concern was that we were paying
- 16 one company -- we were paying one company six,
- 17 seven times
- 18 Q. Yeah. So, I guess, it seemed like Think
- **19** Finance was double dipping, so to speak?
 - A. It was more than double.
- 21 MR. ELLIS: Objection.
- THE WITNESS: Yes, every agreement would
- 23 be another bit.
- **24** (Whereupon, the Court Reporter
- **25** interrupted for clarification.)

- materials was pro forma?
- **2 A.** Yes.

1

- **Q.** So you would agree that you didn't have
- 4 any meaningful input on any of the marketing
- 5 materials; is that right?
- **6 A.** Yes, I agree with that.
- **Q.** And so when we talked earlier about being
- 8 fearful that Think Finance would terminate the
- 9 relationship if you didn't agree with something,
- 10 you would agree that one of the things would be
- 11 that that statement would apply to would be
- **12** marketing, right?
- **13 A.** Yes.
- 14 Q. And so, if you didn't like a direct
- 15 mailing or a website design, you believe you
- **16** wouldn't really be able to put meaningful input
- 17 into that under this agreement; is that right?
- **18 A.** Yes
- **19 Q.** So just a few final questions about this
- 20 agreement. What is your understanding of what
- 21 Tailwind Marketing is?
- 22 A. It's just another, another branch of
- 23 Think Finance.
- **Q.** Okay. And in communicating with Think
- 25 Finance pursuant to marketing, did you ever email

- MR. ELLIS: Objection, argumentative.
- **2** BY MR. GUZZO:
- **Q.** And we earlier talked about how, you
- 4 know, this was seen has a take-it-or-leave-it deal
- **5** for the term sheet, do you remember that?
 - A. Yes.
- **Q.** Would that be the same for the marketing
- 8 agreement?
- 9 A. Yes
- 10 Q. And the same for the servicing agreement,
- 11 right, that was a take-it-or-leave-it agreement?
- **12 A.** Yes.
- 13 Q. And why did they -- did Plain Green's
- 14 employees -- or Plain Green's attorneys have input
- 15 on these agreements, do you recall?
- **16 A.** I meant, they reviewed them, but they
- 17 didn't have really any input, like, I don't ever
- **18** recall them making any modifications or changes to
- **19** them.
- **Q.** And when you say that you were fearful
- 21 that, you know, Think Finance would move to
- another tribe. Do you think that the attorneythat Plain Green shared that same sentiment?
- 24 MR. ELLIS: Objection, lack of
- of foundation
- 25 foundation.

Administrative Services.

Q. Oh, okay. TC, thank you. What does the C stand for?

A. I believe it was like Think Cash or something like that, I remember seeing somewhere, but I couldn't -- I think they had a product before that.

Q. What services does TC Administrative Services provide to Mobiloans?

A. They advise and consult regarding risk management, underwriting, application processing, payment processing, and vendor management.

Q. Would you say that list again, please.

A. I will. Advice and consulting regarding the risk management, underwriting, application processing, processing of payments, and oversight and management of vendors.

Q. So, taking the first one, risk management, what specific services does TC Administrative Services provide to Mobiloans in terms of risk management?

A. They may be the risk department at Think. I used to have emails that had TC Decision Sciences and TC Administrative Services, but after the split with Elevate, everything is Think Finance.

Q. And can you name anyone who works at TC Administrative Services?

A. Correct. Correct. Because we know that these companies are Think companies. We know that their employees are doing those jobs.

Q. What specific services do TC Administrative Services or Think provide with regard to underwriting?

A. They develop the underwriting. They have a proprietary risk core that we use that the initial underwriting that was used was created by them. I know that there's been changes from inception in regards to different types of data that is used in the underwriting, but that basic criteria is maintained the same. Their risk score comes from their data that they have in regards to customer activity, and they create a risk core based off of that.

Q. Customer activity with Think Finance or with these loans, or from other --

A. With I'm sure all of the products that they service. They have created a data pool from there where they can determine with more precision behaviors that would lead to first payment defaults, that type of thing.

BY MR. VAUGHN:

Q. So, the software generates -- based on the data inputs, the software generates a risk score, and if the penultimate risk score falls within --

A. Currently, no. I could look through some emails and see if there's any current emails with that, but most everything now is Think Finance. I know at one point that the Stephen Smith that I had interviewed with is their compliance director, he was part of TC Decision Sciences because I would get emails from both, both email addresses for him, but mostly everything now is just Think Finance.

Q. So, what specific services do they provide in terms of risk management?

A. That would probably be the risk in setting up the 7x7 matrix and the marketing and the default rate, that type of thing.

Q. Is there any other services you can think of that would fall under the heading risk management?

A. Part of the underwriting, when we're looking at changes in the underwriting, risk is definitely in there in looking at different options as to changing the format of the underwriting process.

BY MR. VAUGHN:

Q. But to be clear, there is a legal agreement that spells out that TC Administrative is supposed to get \$25 per funded loan, but as you sit here today, you're not certain which services Think provides that fall under that umbrella?

1 A. A certain range, correct.

O. -- the loan will be funded?

A. Correct. Or declined.

Q. Or declined. And it's your understanding that the risk score that's generated is a product of Think's analysis of all of the products that they service?

A. Correct. When I had gone through when I sat down with him with regards to the underwriting, learning that process, there, of course, is a whole flow chart basically of when the loan comes in, you know, the points that it hits, what's a knockout rule that would immediately knock that out, it requires verifications, manual verifications, that kind of thing, but when they get to the risk score, it's kind of their proprietary thing. They won't give me all the details.

I know the items that make it up, but I don't know how it's weighted to create that score, because they consider that proprietary, they won't give me that information.

Q. So, you know what the data inputs are that go into the database, the decision engine?

A. Correct.

Q. But you don't know how the decision engine comes up with a score?

A. With the risk score. How it's weighted in order

40 (Pages 157 to 160)

161 163 1 O. What services does TC Administrative Services. 1 to create the score. But I know what the inputs are 2 2 or Think Finance, provide with regard to payment that they look at for that. 3 O. And you know certain knockout rules that will 3 processing? 4 automatically disqualify an applicant? 4 A. It goes through their system. I mean, when a 5 5 A. Correct. customer wants to make a payment, they can go online, 6 Q. But if an applicant makes it past the knockout and they can set up to have an ACH payment from their 6 7 7 rules, you don't know what happens between then and the account and they can set that up online through their 8 risk score to come up with a risk score? 8 account. So, all of that will go through the platform 9 9 where it's posted in that information. A. I know that it continues to go through the 10 10 underwriting process, and part of that underwriting If they want to set up where they revoke the ACH 11 and they want to just send a manual payment, then they 11 process is the risk score, and that's based on points, 12 data points, within that application. How that's 12 can take that part off of the system. 13 13 weighted to create the risk score and how they generated If they want to pay by a debit card, they can 14 14 what's a cut-off score, I don't have that information. call in and say, I want to make this payment via a debit 15 card, and that system is through the platform. So, 15 Q. You don't actually have the cut-off score? 16 A. No, I have the cut-off score, but how they 16 that's where they're providing the help in the 17 determine what was a cut-off score. You know, so they 17 processing, the payment processing. 18 BY MR. VAUGHN: 18 have that information. 19 19 O. So, you know the cut-off score is 460? Q. Before the lunch break, you testified that Think 20 20 uses an out-of-date software platform that was A. Correct, yeah. 21 21 Q. But you don't know how they figure out that my originally designed for credit cards that's resulted in 22 22 application is 520? lots of problems. Is that the computer system that 23 23 A. Correct. you're talking about now that processes ACH payments and 24 24 BY MS. BUCHKO: provides those services, or are you talking about a 25 Q. Does anybody at Mobiloans have that information? 25 different system? 164 162 A. No. Again, they consider that proprietary and 1 1 A. In regards to posting them to the account, I 2 they won't give us that piece of it. 2 believe when you take an ACH payment, it has to go 3 BY MR. VAUGHN: 3 through the processor. So, when the funds are actually 4 4 Q. And you've asked? posted to the account, it goes through that platform 5 5 A. Yes. system. 6 6 Q. Who did you ask? Q. And that's the platform that you were talking 7 7 A. I asked Martin Wong, I have asked the risk about earlier? people, I have asked the underwriting people, and -- but 8 8 A. Correct. Correct. 9 9 they consider it proprietary and they will not give me O. And is this -- I've heard it referred to as 10 that information. 10 CoreCard, is that your understanding that the Core 11 BY MS. BUCHKO: 11 system is the loan management system that handles the 12 Q. Do they have any nicknames for that proprietary 12 servicing of the loan, the payments and those types of 13 information? 13 issues? 14 A. No, it's -- unless it's RS, which is risk score, 14 A. Correct. And some of the issues when we were 15 11, which is the version that they are using. That's 15 talking about the double payments has to do when the what they're -- you know, when I'm looking at the system or Core or whatever creates the ACH file to send 16 16 17 underwriting waterfall, and we come up to the RS score, 17 to the banks, the would could be a problem where it 18 that's what they're talking about. 18 actually doubles it. That's where the processing 19 Q. Earlier you said something about "we use the 19 issues, where Think's issues -- now, there were some 20 proprietary risk score." What exactly does Mobiloans do 20 issues with the processor themselves, but there were 21 21 with the proprietary risk score? some issues with the Think -- it was the platform that 22 22 A. Our applications go through -- and I say we, created the issue. 23 23 because I'm talking about our customers go through that Q. The loan management platform? 24 system. We -- that's our vendor, we're paying for that. 24 A. Correct. 25 25 BY MS. BUCHKO: So, that's just the way I refer to it.
